ABOUT ME

Motivated Data & AI engineering student with a strong interest in machine learning, data analysis, and intelligent applications. Skilled in Python, SQL, data preprocessing, machine learning fundamentals, and web-based AI tools. Currently building practical projects in NLP and customer churn prediction, and seeking a summer internship to contribute to real-world data-driven solutions.

ACADEMIC & PERSONAL PROJECTS

- **AI Resume Matcher**
 - Built a web app that compares a CV with an internship description.
 - Used TF-IDF and cosine similarity to calculate a match score.
 - Identified matched and missing keywords for CV improvement.
 - Added PDF upload and downloadable analysis report.

- **Customer Churn Prediction**
 - Built a ML app to predict telecom customer churn risk.
 - Cleaned data, explored patterns, encoded features, and trained models.
 - Compared Logistic Regression and Random Forest using key metrics.
 - Selected Random Forest for better recall on at-risk customers.
 - Created a Streamlit app to predict churn probability.
