

LAMGHARI Ahmed

lamghariahmed2026@gmail.com | +212786498187 | Casablanca - Agadir

SUMMARY

Engineering student at ENSAM Casablanca specializing in backend development and DevOps practices. Experienced in designing scalable APIs, containerized applications, and CI/CD pipelines. Seeking an internship to strengthen skills in software architecture and distributed systems.

EXPERIENCE

Wilaya de la Région Souss Massa

Software Engineer Internship

Agadir, Souss-Massa, Morocco (Remote)

Jul 2026 – Sep 2026

Analysis and Scoping: Authored the requirements study and drafted the functional and technical specifications.

Software Architecture: Designed the technical structure and data flow of the application. **Development:** Designed and implemented a mobile application dedicated to fleet management.

Valtic

Data Engineer Internship

Casablanca-Settat, Morocco (Hybrid)

Jun 2026

ETL Design: Assisted in designing and structuring an ETL pipeline for data processing. **Categorization:** Performed UNSPSC product and item categorization. **AI Integration:** Integrated AI capabilities to enhance data processing workflows.

GDG Trainer

2025–2026

Delivered a workshop on socket programming using C in a UNIX environment. Covered networking fundamentals and hands-on implementation.

EDUCATION

ENSAM Casablanca, Morocco

Engineering Degree in Artificial Intelligence and Computer Engineering

2025–2028

ENSAM Casablanca, Morocco

Integrated Preparatory Cycle

2022–2025

SKILLS

Programming Languages: Python, TypeScript, C, Java, PHP

Frontend: React, Tailwind CSS

Backend: Node.js (Express), Laravel, Spring

Databases: MongoDB, Oracle, SQLite

DevOps: Docker, Git, GitLab CI/CD, Nginx, Linux

Cloud: AWS, Cloudinary

Other: REST APIs, RabbitMQ, Hibernate, Sockets, Kubernetes (notions)

PROJECTS

Microservices Architecture

2026

Designed and implemented a scalable microservices-based system using Spring Boot, integrating distributed architecture patterns and service communication.

EmpireBuild

2026

Developed a full-stack workspace planner application using the MERN stack, containerized with Docker and configured with automated database seeding.

Portfolio v1

2026

Built and styled a personal portfolio website to showcase technical projects, skills, and engineering background with a responsive interface.

CERTIFICATIONS

Low Level System Design, Design Patterns and SOLID Principles – Udemy (In Progress)

GitLab CI/CD: Pipelines, CI/CD and DevOps – Udemy

High Scale System Design – Udemy

Containerization and Virtualization with Docker and Kubernetes – DataCamp

The Web Developer Bootcamp – Udemy
